| <p>Notes: Data are from DHCFP Hospital Discharge Data for FY2005. Surgeons are not listed if they performed fewer than 10 procedures statewide in 2005. Surgeries performed in US government hospitals (e.g., Veteran's Affairs (VA) hospitals) are not included in this report.</p> <p>Definitions:</p> <p>Cardiac Surgery refers to surgery on the heart and the thoracic great vessels performed on persons 18 years of age and older. Examples of cardiac surgery include coronary artery bypass grafts, heart valve repair or replacement, heart transplantation, surgery of the thoracic aorta, repair of congenital heart defects and minimally invasive heart surgery.</p> <p>CABG (Coronary Artery Bypass Surgery)- an operation in which the blocked coronary artery is bypassed with the patient's own vessel to improve the flow to the heart muscle. Coronary vessels are those vessels that supply the heart muscle with blood and oxygen.</p> <p>Isolated CABG (Isolated Coronary Artery Bypass Surgery) – Isolated CABG is a surgical procedure in which CABG is the only major cardiac surgery performed.</p> | | |
